WHAT MAKES MCN UNIQUE?

Unlike traditional Neurofeedback, which requires patient participation; MCN allows you to simply relax while being treated. A brief tiny signal transmitted to the brain does all the work for you.

WHO CAN BE TREATED WITH MCN?

There is no medical condition, age, medication, allergy, etc. that would restrict one from safely using MCN.

HOW LONG DOES EACH SESSION TAKE?

Initial session may take 45-60 minutes in total. Follow up sessions may take 25-30 minutes.

IS IT SAFE?

The MCN system we use employs an FDA registered EEG amplifier that is one-millionth lower than the strength of a cell phone signal. It is extremely safe.

DOES IT INTERFERE WITH MEDICATION?

No. Often after successful treatment, prescription drugs may be reduced or discontinued, with physician approval.

IS THIS TREATMENT FOR ME?

Schedule a FREE consultation with no obligation. Learn how MCN can help you.
